

M-M-Membership: Appreciation is Delicious

We all know membership should have its perks. As a member of ASQ Denver Section, you have access to a local network of like-minded people. Come join your network at the annual Member Appreciation Dinner on June 12th.

The dinner is free for members and their families. It is the ASQ Denver Leadership Team's way of saying thank you to all the area ASQ members who have chosen the Denver Section for their local connection. Let's enjoy an evening getting to know one another.

This year's event is being held at the Breckenridge Brewery Farmhouse in Littleton. The private venue features a bar, a warm and cozy dining area and a beautiful outdoor patio. In addition to dinner, we've scheduled a unique tour with the brewery's Quality Specialist. The tour follows the typical route but offers a chance to ask questions only our crowd would find interesting. Come find out how to quantify viable yeast cells.

Dinner is free; the tour is \$5. See the Events page at www.asq1300.com.

June Reliability Class Tackles Tough Exam Topic

Reliability, acceptance sampling, and quantitative methods are the three most commonly failed topics on the CQE exam. The upcoming ASQ Denver Reliability Class helps you prepare by focusing on one of these tough topics.

The class will cover predictive and preventive maintenance tools and reliability and maintainability indices, models and tools. The objective will be to understand the reliability concepts of the CQE Body of Knowledge and their practical application using exercises and examples.

The class is being held on Saturday, June 9th at Red Rocks Community College from 8 AM to 4 PM. The cost is \$75 and includes class material, lunch and morning and afternoon snacks. Your ASQ Denver Leadership Team hopes you will take advantage of our new, lower class fees!

Maps For A Fellow Member

ASQ Denver Section Member Jane Martel is looking for process maps to use as examples during an upcoming presentation. If she can't find ones she has permission to use, Jane says she'll have to use fabricated maps.

Jane is presenting at a workshop for the Research Institute for Public Libraries in Atlanta this summer. The workshop is on analyzing process maps for waste. So real maps with real waste would be a real benefit.

If you would like to help Jane out, please contact info@asq1300.org and we'll help you connect.

Conference Seeks Speakers

Can you offer a quick insight or a different spin on a quality concept? The Rocky Mountain Quality Consortium needs volunteers to speak on short topics about quality. They provide the platform and training to record your presentation. Take a look at www.RMQC.org and contact Terra.Stern@SSDGlobal.net if you are interested. They also need volunteers to view presentations before posting.

Look for more information about these and other great events on our website: www.asq1300.org.
